“Who Is the Most Unemployed? Factors Affecting Joblessness,” by Lela Somoza, staff writer for EconSouth

EconSouth First Quarter 2012

Discussion questions
1. What has been a leading factor in the unemployment gender gap? Cite evidence from the article to support your answer? What is the origin of the term “mancession”? Explain.
2. What has happened to the unemployment rate for women during the recovery and how does this compare to the historic trend since the 1970s according to a July 2011 Pew Research Center study? Explain.
3. Why might longer-term employment trends favor women? Cite evidence from the text to support your answer.
4. Which group had the highest unemployment rate during the recession? Cite reasons that young workers traditionally have higher unemployment rates.
5. According to The Kids Aren’t Alright—A Labor Market Analysis of Young Workers, a 2010 report by Kathryn Anne Edwards and Alexander Hertel-Fernandez of the Economic Policy Institute, why were young workers even more likely to lose their jobs during this recession than previously? What are the long-term implications?
6. Which age demographic is spending a longer time out of work? Cite data from the article to support. What are the implications and what is happening to the labor force participation rate for this group?
7. What are some reasons that explain why blacks have had higher rates of unemployment?
8. What role has education played in labor market outcomes?
