

Data Digest: Louisiana

April 2013

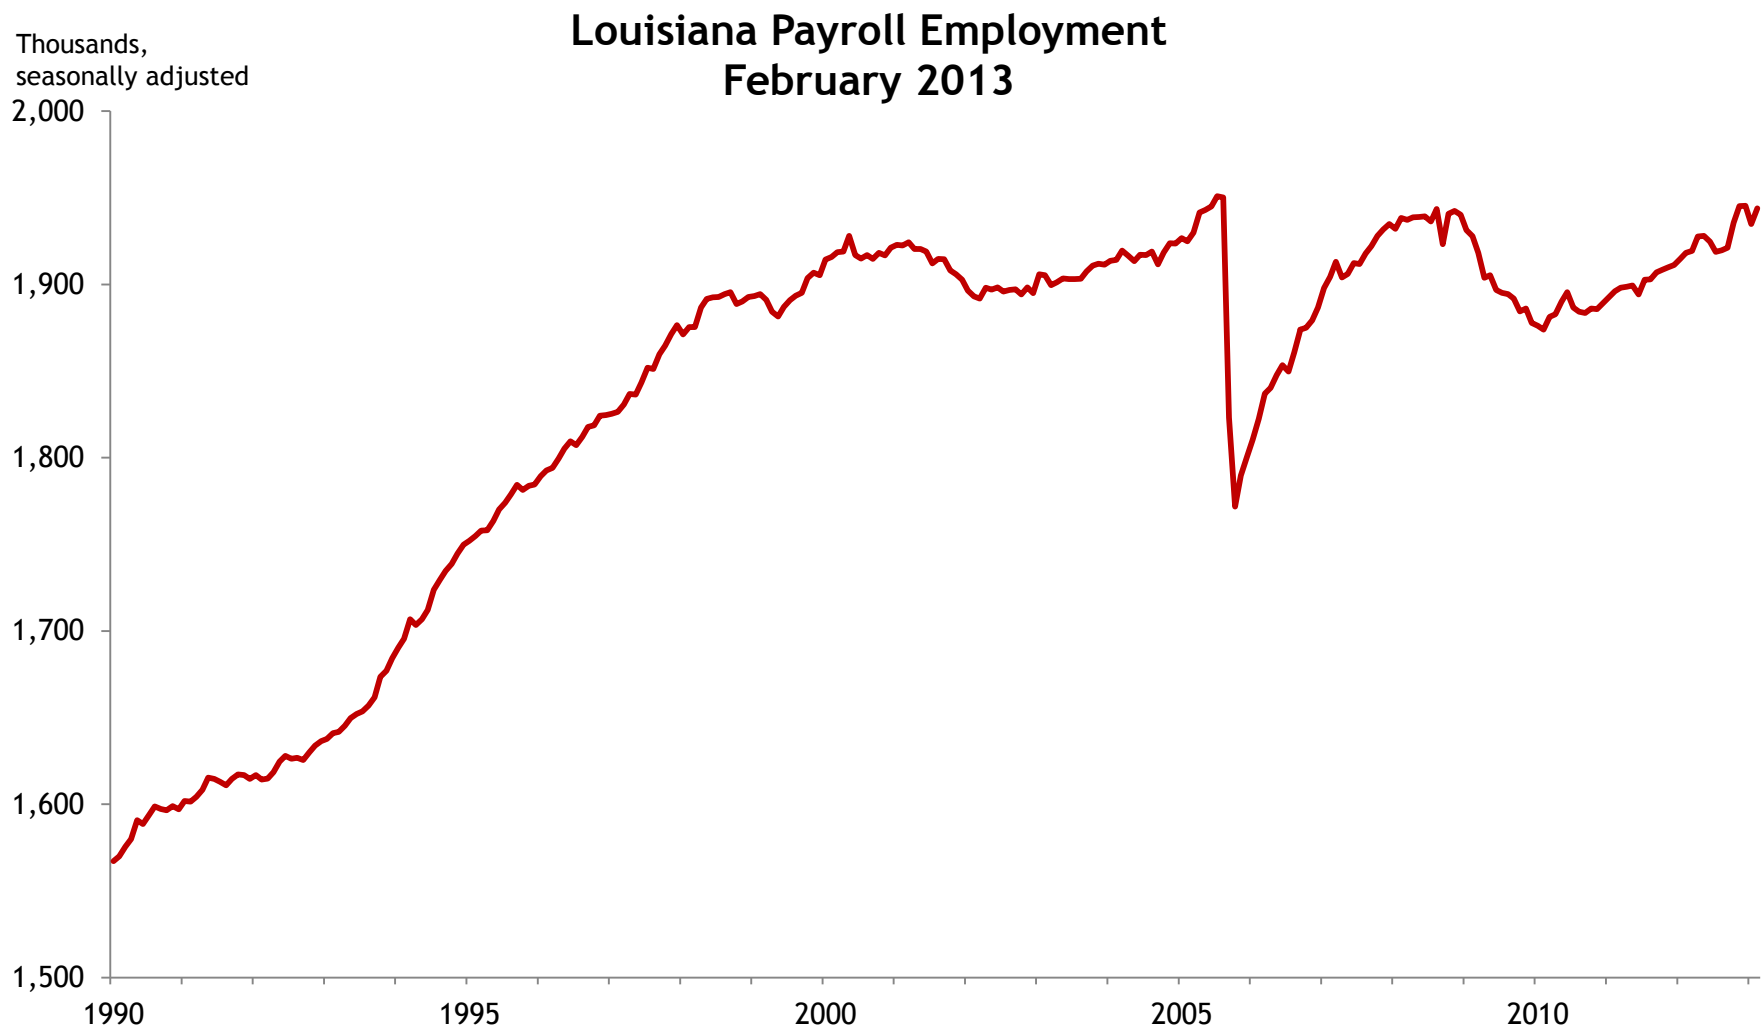

A broad indicator of economic activity in Louisiana has been trending upward, but it remains below that of the nation.

[About the Coincident Economic Indicator](#)

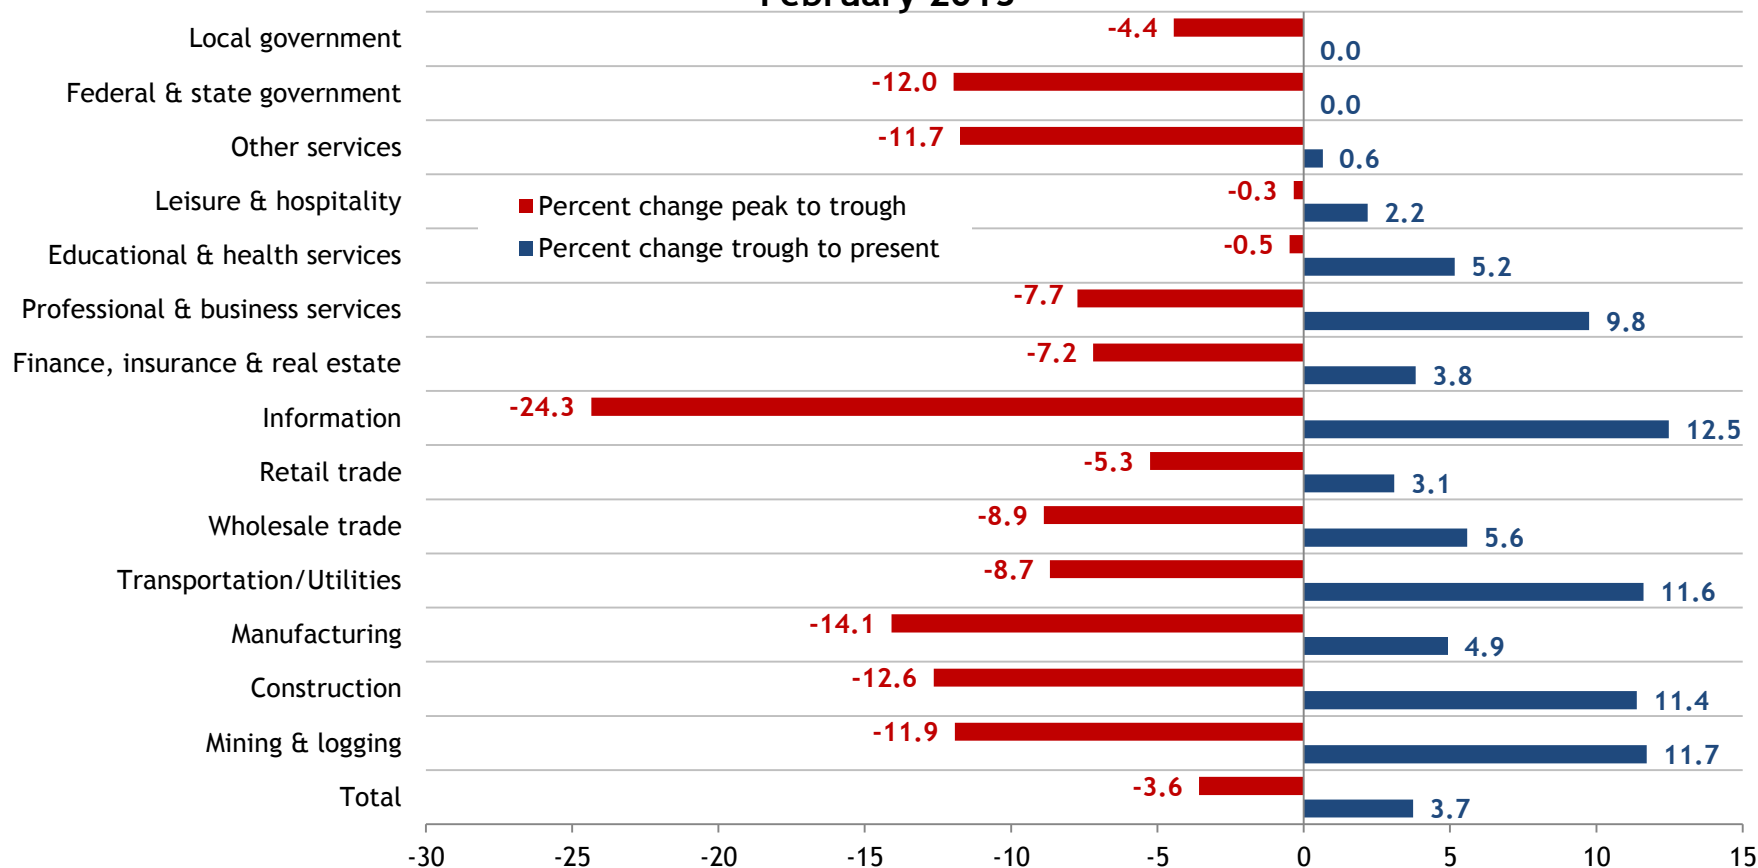

Total employment in Louisiana is near its all-time high.

Source: U.S. Bureau of Labor Statistics, Haver Analytics

Louisiana lost a total of 3.6 percent of its jobs during the downturn. Since the trough, total employment has risen 3.7 percent. Most industries have added jobs since their trough and a few sectors have regained all the jobs lost during the downturn.

Employment Loss and Gain by Industry: Louisiana February 2013

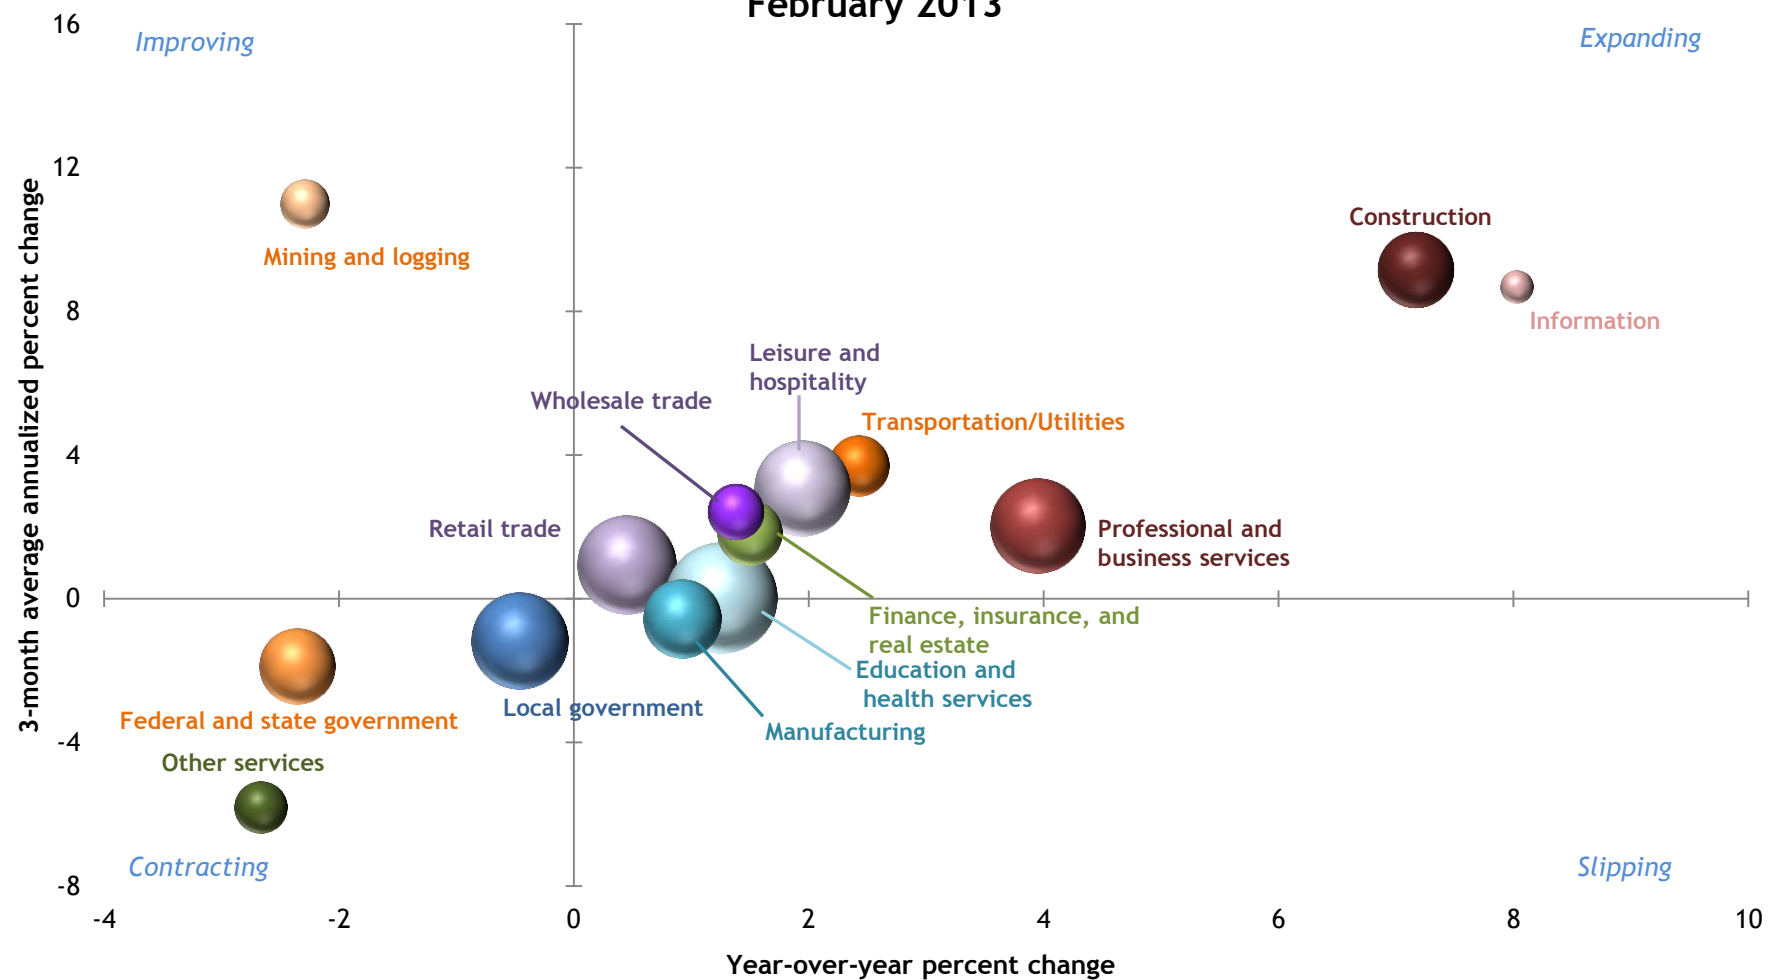

Note: A reading of 0.0 in the “trough to present” measure indicates that employment continues to decline in these industries. Likewise, a reading of 0.0 in the “peak to trough” measure indicates that employment continues to increase in these industries; in this instance “trough to present” is the percent change from January 2007 to present.
